Programming/Backend

- > ASP.NET MVC/Web Forms, C#, RESTful API, Windows Services

Frontend/Data

- > HTML5, CSS3, Bootstrap, AJAX JavaScript, jQuery, JSON, XML

Database Technologies

- > Microsoft SQL Server, Stored Procedures, Query Optimization

Development Tools

- > Visual Studio (2008–2017), Visual Studio Code, Git

Methodologies & Leadership

- > SDLC, Agile, Project Planning & Estimation, Resource Allocation, Team Leadership & Mentoring

Working Experience

Senior Software Engineer

Tricor Senedi/Tricor SSC (May 2013 - December 2020)

- > Provided on-site and remote application support for corporate clients, working directly with business users to investigate issues, gather requirements, deliver enhancements, and ensure system stability.
- > Led multiple application modernization initiatives, including a strategic legacy system transformation undertaken in collaboration with Directors and the CIO at corporate headquarters, delivering workflow, usability, and architectural improvements that enhanced maintainability, scalability, and user experience.
- > Designed and implemented automation and process optimization solutions that transformed manual business operations into streamlined digital workflows, including a payroll reporting system that reduced report generation time from 5–7 days to under 30 minutes.
- > Led end-to-end delivery of corporate software projects across the full SDLC, collaborating with business stakeholders and development teams to gather requirements, define solutions, manage scope and change requests, provide technical consultation, oversee project planning and resource allocation, and ensure successful delivery.
- > Led and mentored development teams across multiple projects, coordinating task assignments based on individual expertise, reviewing code quality, establishing development standards, promoting best practices, and ensuring compliance with development processes to achieve successful project delivery.
- > Referrals: Karyn Mak, 016-322 3080
Transformation Associate Director @ InCorp Global
- Vincent Lim, 016-281 3868
Practice Lead - IT @ Tricor SSC

Application Support (Contract)

Tricor SSC (Jan 2021 - Jan 2022)

- > Independently managed support and maintenance activities for a pharmaceutical business platform, collaborating directly with business users to resolve issues, analyze requirements, and implement system enhancements.
- > Performed data extraction, transformation, and loading (ETL) activities, ensuring data accuracy and supporting business operations through efficient data management

Business Operations Support

Family-Owned Real Estate Company (Jan 2023- May 2026)

- > Supported operational management activities, including transaction verification, documentation review and payment authorization.
- > Reviewed existing business procedures and identified opportunities for process simplification, implementing digital workflows that reduced manual paperwork and improved operational efficiency.
- > Assisted in maintaining business continuity and operational efficiency due to family medical situation.

Technical Projects & Professional Development

AI-Assisted Mobile Productivity Application (May 2025 - Present)

- > Designed and developed a Flutter/Dart proof-of-concept mobile app focused on voice-recognition for task automation, including natural language processing of user commands for alarm scheduling.
- > Researched AI-assisted application design and Large Language Model (LLM) integration to evaluate opportunities for enhancing user productivity and automation workflows.
